

Setting Up Amazon will allow you to buy and download MP3 tracks and albums directly to your musicm8

1. Visit Amazon.com

- Click here to go to Amazon to get the Amazon Music Downloader.
- Follow the guide to download and install the utility for your operating system (it supports Windows, Mac and Linux)

2. Edit Your preferences

- Open the newly installed application.
- Choose File > Preferences

- Click **Change**
- Browse to Network > musicm8 > music
- Click OK
- Under **Media Library** Choose **Do Nothing**, then click **OK**.

And finally - go buy some music!

Simply visit your local Amazon page and go to the MP3 downloads pages - when you buy any new content, it will automatically be downloaded to your musicm8 and available for you to play immediately.
