XiVA-Net

XiVA-Net is the new exciting Internet based service from Imerge Ltd, dedicated to delivering music-related information and services to Imerge's S1000 SoundServer and other XiVA™ enabled media appliances.

Overview

XiVA-Net is a revolutionary entertainment portal to which all XiVA™ media appliances can connect to gain access to Internet-based content and services via a standard TV.

Having joined with an exciting range of content partners XiVA-Net is able to provide a wealth of music focused services for XiVA™ appliance owners.

Users can access the latest music news together with album, single and DVD reviews from the country's leading music Website dotmusic.com.

The latest event information for over 7000 UK venues is provided by Livegigguide and the latest UK and US single and album charts are provided by the Official Charts Company.

Future services will include CD purchase from 101CD.com via XiVA-Net and access to biography and discography information from US company Muze.

Key Features:

- Get up to the minute information on gigs in your area and around the country.
- Check out album and single reviews before you buy.
- Read the latest music news.

Benefits:

- Simple and intuitive to use with an IR remote control
- Sit back service – no PC necessary.
- Read about you favourite artist with thorough and knowledgeable commentary.
- Dedicated phone number for ticket purchase.
